How did the Fund perform last year? What affected the Fund's performance?

FUND AND MARKET PERFORMANCE

For the fiscal year ended April 30, 2026, the Steward Global Equity Income Fund (Class C) (the “Fund”) returned 24.42%, underperforming the MSCI World Index (the “Benchmark”) return of 29.68%. For dividend income comparison purposes, the MSCI World High Dividend Yield Index returned 20.82%.

POSITIVE AND NEGATIVE CONTRIBUTORS TO PERFORMANCE

The Fund’s allocation at the end of the period was 60% U.S. and 40% international. From a country perspective, the U.S. was the largest contributor to performance with a total return of 15.76%. Canada (14.03% of total net assets) was the second largest contributor with a total return of 47.38%. India (0.98% of total net assets) and the Philippines (1.25% of total net assets) were negative contributing countries, with total returns of -23.92% and -8.85% during the period, respectively.

The leading positive stock contributors to performance included Taiwan Semiconductor Manufacturing Co. (3.97% of total net assets), Broadcom Inc. (3.11% of total net assets), and Analog Devices, Inc. (1.86% of total net assets). Total return for these stocks was 139.88%, 118.63%, and 109.55% during the period, respectively. Leading negative stock contributors to performance were Paychex, Inc. (1.53% of total net assets), Accenture PLC (0.94% of total net assets), and Broadridge Financial Solutions, Inc. (1.38% of total net assets). Total return for these stocks was -34.81%, -39.50%, and -35.38% for the period, respectively.

Relative to the Benchmark, performance was negatively impacted from relative underweights in NVIDIA Corp., Alphabet Inc., and Micron Technology which rose 83.27%, 143.15%, and 573.71% during the period, respectively. These stocks were excluded from the Fund because their dividend yields failed to meet longstanding minimum criteria for the strategy.

For the fiscal year ended April 30, 2026, the Fund’s values-based screening policies had a positive impact on performance relative to the Benchmark. For example, the screens restricted UnitedHealth Group from purchase in the Fund due to the company’s Abortion activities as well as Philip Morris International due to its Tobacco business. Total return during the period for these stocks was -7.40% and -0.24%, respectively. Not owning these underperforming stocks positively impacted Fund performance.

Fund Performance

The performance graph below shows the performance of a hypothetical \$10,000 initial investment in the Fund's Class C over a ten-year period (or for the life of the Fund or share class, if shorter). The subsequent account value as of the end of the reporting period is listed next to the name of the Fund or index, as applicable. The performance table below shows the average annual total returns of the Fund's Class C for the past one-, five- and ten-year periods, as applicable (or for the life of the Fund or share class, if shorter), as of the end of the reporting period. Both the graph and table compare the performance of the Fund's Class C to an appropriate broad-based index and may compare to additional indices reflecting the market segment(s) in which the Fund invests, over the same periods.
