Barclays Capital Gov/Credit	4.52%	6.59%	8.74%	4.82%	-2.35%	6.01%	0.15%	3.05%	4.00%	-0.41%

Composite Growth of \$1 Million – 10 Years ³

¹ Returns greater than one year are annualized.

² Model Portfolios are based on a hypothetical account managed during the current quarter. Actual characteristics and income may differ materially from model.

³ Source: Zephyr StyleADVISOR.

⁴ Yield to Effective Maturity

⁵ Yield to Worst

The current quarter's data is preliminary. Net performance was calculated using the hypothetical highest annual all-inclusive wrap fee of 3% applied quarterly.

Strategy Objective:

The Crossmark Core Fixed Income strategy seeks active duration management and the selective rotation of market sectors and the securities within those sectors.

- High Quality Securities
- Active Duration Management
- Selective Sector Rotation
- Selective Security Rotation
- Intermediate-Maturity

Investment Process

The Strategy employs a four-step process that seeks to outperform the bond market over a market cycle while providing positive returns on an annual basis.

Crossmark Global Investments, Inc. is an investment advisor registered with the Securities and Exchange Commission under the Investment Advisers Act of 1940. Crossmark claims compliance with the Global Investment Performance Standards (GIPS®). Prospective clients can obtain a compliant presentation and/or list of composite descriptions by sending a request to: advisorsolutions@crossmarkglobal.com

Crossmark Core Fixed Income Wrap Composite contains fully discretionary wrap fixed income accounts. Core Fixed Income portfolios are invested in bonds of primarily intermediate maturity to provide high income and preservation of capital. The composite excludes portfolios for which the clients have imposed restrictions or requirements that impede the manager from fully executing their strategy such that the results will not be representative of the strategy. For comparison purposes the composite is measured against Barclays Capital Government/Credit Bond Index. The Barclays Capital U.S. Government/Credit Bond Index measures the performance of investments grade corporate debt and agency bonds that are dollar denominated and have a remaining maturity of greater than one year.

The U.S. Dollar is the currency used to express performance. The performance reflects the reinvestment of dividends and other earnings to the extent that client accounts included in the composite elected to reinvest dividends and earnings. Performance figures shown gross of fees do not reflect the payment of investment advisory fees.

Past performance is not an indicator of future results. Investments made using this strategy involve risk of loss, including the potential loss of principle. The principal risks associated with the CIP investment strategy are credit risk (the risk that an issuer will be unable to pay the principal and interest due), interest rate risk (the risk that the value of a particular bond will fluctuate as market interest rates fluctuate), liquidity risk (the risk that the trading market for a particular bond is reduced), and duration risk (interest rate risk over time).

GIPS® is a registered trademark of CFA Institute. CFA Institute has not been involved in the preparation or review of this report/advertisement.
