

# QUARTERLY UPDATE: 3Q 2021 GLOBAL EQUITY INCOME COMMENTARY

Global Equity Income is a separately managed account investment strategy

written by  
**John Wolf**, Managing Director

## Markets and Performance

Global equity markets posted mixed results in total return for the third quarter. The Global Equity Income SMA benchmarks (the S&P Global 1200 Index and the S&P 500 Index) ended the quarter with returns of -0.65% and 0.58%, respectively. Dividend stocks overall underperformed the general equity market. For global dividend index comparison purposes, the MSCI World High Dividend Yield Index returned -2.04%. The Global Equity Income model portfolio outperformed the MSCI World High Dividend Yield Index but underperformed the S&P Global 1200 Index for the quarter, returning -1.28%.

## Positive and Negative Contributors to Performance

NetApp, Inc. (2.50% of total net assets), a hybrid cloud data services and data management provider, was a positive relative performer for the quarter. Shares climbed 10.38% on a solid earnings report that beat analyst revenue and net income estimates. Additional earnings gains were generated through increased margin expansion and accelerated top-line growth. Fears of supply chain inflation (that did not materialize) and a broad recovery in enterprise spending drove the results. The company has also increased its forward guidance estimates across nearly all segments. Quest Diagnostics Inc. (2.10% of total net assets) rose 10.62% as the company updated its full-year outlook to reflect better than expected COVID-19 testing volumes. Both revenue and earnings estimates have been revised higher, and this increase has boosted guidance by approximately 9%. These higher volumes are anticipated to continue due to the surge in the Delta variant. The company's base business has also seen continued improvement despite a modest decline in August due to increased vacations and storm disruptions.

Negative contributors to relative performance included Companhia Brasileira de Distribuicao (0.70% of total net assets), which dropped -39.54% in the third quarter. The Brazil-based supermarket and department store retailer had posted an impressive (+41%) second-quarter return that was boosted by increased demand for essentials. The ongoing pandemic led to customers stockpiling supplies and increasing consumption at home. This trend has moderated recently as demand returns to a more normal level. Shares of Cardinal Health Inc. (1.60% of total net assets) dropped -12.51% after the company reported weak quarterly results. The company's revenue grew at 15% versus the same fiscal quarter last year, but it was a weak comparable period. Also, an unexpected adjustment of \$197 million for inventory reserves weighed down profitability. The adjustment was due to an excess supply of personal protective equipment and a resulting reduction in price. The company also provided fiscal 2022 guidance that was below analyst consensus.

## Looking Ahead

The new COVID variants have begun to impact the U.S. economic recovery, particularly in the south, where the number of cases has been rising significantly. Renewed outbreaks across Asia have also increased risks in that region. Investors are reassessing economic growth outlooks as another wave of outbreaks reduces expectations. This scenario has temporarily reestablished growth-style equity momentum in the market as technology software, hardware companies, and media companies were favorably positioned. The markets, however, are forward-looking, and as we project beyond the current pandemic wave, the style rotation should reverse as value and dividend income stocks come back into favor.

## Global Equity Income Top 10 Model Holdings <sup>1</sup>

Eli, Lilly & Company	2.8%
McDonald's Corp.	2.5%
Texas Instruments, Inc.	2.5%
NetApp, Inc.	2.5%

**Crossmark Global Investments, Inc. (Crossmark)** is an investment adviser registered with the Securities and Exchange Commission that provides discretionary investment management services to mutual funds, institutions, and individual clients. Investment advice can be provided only after the delivery of Crossmark's firm Brochure and Brochure Supplement Form ADV (Parts 2A and 2B) and Form CRS, and once a properly executed investment advisory agreement has been entered into by the client.

**All Investments are subject to risks, including the possible loss of principal. Past performance does not guarantee future results.** The Global Equity Income strategy may not achieve its objective if the managers' expectations regarding particular securities or markets are not met. Equity investments generally involve two principal risks—market risk and selection risk. The value of equity securities will rise and fall in response to general market and/or economic conditions (equity market risk). The value of any individual equity security will rise and fall in response to the market's perception of the issuer's revenues, earnings, balance sheet, credit worthiness, business plan, and overall perception of the viability of the issuer's business (selection risk). Investments in securities of issuers in foreign countries involves additional risks not associated with domestic investments. These risks include, but are not limited to: (1) political and financial instability; (2) currency exchange rate fluctuations; (3) greater price volatility and less liquidity in particular securities and in certain foreign markets; (4) lack of uniform accounting, auditing, and financial reporting standards; (5) less government regulation and supervision of some foreign stock exchanges, brokers and listed companies; (6) delays in transaction settlement in certain foreign markets; (7) less availability of information; and (8) imposition of foreign withholding or other taxes.
