Investment Process

The Strategy employs a four-step process that seeks to outperform the bond market over a market cycle while providing positive returns on an annual basis.

Crossmark Global Investments, Inc. is an investment advisor registered with the Securities and Exchange Commission under the Investment Advisers Act of 1940. Crossmark claims compliance with the Global Investment Performance Standards (GIPS®). Prospective clients can obtain a compliant presentation and/or list of composite descriptions by sending a request to: advisorsolutions@crossmarkglobal.com

Crossmark Intermediate Fixed Income Wrap Composite contains fully discretionary wrap fixed intermediate accounts. Fixed Intermediate portfolios are invested in bonds of intermediate maturity to provide high income and preservation of capital. The composite excludes portfolios for which the clients have imposed restrictions or requirements that impede the manager from fully executing their strategy such that the results will not be representative of the strategy. For comparison purposes the composite is measured against the Barclays Capital Intermediate Government/Credit Bond Index. Barclays Intermediate Govt/Credit Bond is an unmanaged index that tracks the performance of intermediate term U.S. government and corporate bonds.

The U.S. Dollar is the currency used to express performance. The performance reflects the reinvestment of dividends and other earnings to the extent that client accounts included in the composite elected to reinvest dividends and earnings. Performance figures shown gross of fees do not reflect the payment of investment advisory fees.

Past performance is not an indicator of future results. Investments made using this strategy involve risk of loss, including the potential loss of principal. The principal risks associated with the Intermediate Fixed Income investment strategy are credit risk (the risk that an issuer will be unable to pay the principal and interest due), interest rate risk (the risk that the value of a particular bond will fluctuate as market interest rates fluctuate), liquidity risk (the risk that the trading market for a particular bond is reduced), and duration risk (interest rate risk over time).

GIPS® is a registered trademark of CFA Institute. CFA Institute has not been involved in the preparation or review of this report/advertisement.

Global Investment Performance Standards

Our Firm:

Crossmark Global Investments is a boutique investment management firm that provides a full suite of investment strategies to institutional investors, financial advisors, and the clients they serve. VICTORIA FERNANDEZ, CFA®
Chief Market Strategist

24 years of experience.

Supported by the entire Crossmark Global Investments team.

Morningstar Rating™

★★★★	OVERALL
★★★★	3 YEAR
★★★★	5 YEAR
★★★★	10 YEAR

Overall, 3 Year, 5 Year, and 10 Year rating in the Short-Term Bond category as of 12/31/2019.

The Morningstar Rating™ or “star rating”, is calculated for separate accounts with at least a three-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.
