⁵ Median

⁶ Source: Factset iShares Core S&P 500 ETF

The current quarter's data is preliminary. Net performance was calculated using the hypothetical highest annual all inclusive wrap fee of 1.50% applied quarterly.

Strategy Objective:

The Crossmark Israel Impact investment strategy is a domestic equity strategy built to provide a large cap, risk-controlled investment experience using only those companies that are active in Israel – including financial and strategic investments, cooperation, education and additional criteria.

- Large Cap Equity Allocation
- Companies Positively Impacting the Israeli Economy
- Long-Term Capital appreciation
- A Risk-Controlled Optimization Investment Process

Investment Process

The Strategy employs a six-step process that combines dividend income style with relative risk controlled portfolio construction and values screening policies:

Our Firm:

Crossmark Global Investments is an innovative investment management firm. We provide a full suite of investment management solutions to institutional investors, financial advisors and the clients they serve. We have a multi-decade legacy of specializing in values-based investment strategies for clients. Founded in 1987, the firm is headquartered in Houston, Texas and manages approximately \$5.0 billion in AUM.

ZACK WEHNER
Portfolio Manager

Supported by the entire Crossmark Global Investments team.

Crossmark Global Investments, Inc. is an investment advisor registered with the Securities and Exchange Commission under the Investment Advisers Act of 1940. Crossmark claims compliance with the Global Investment Performance Standards (GIPS®). Prospective clients can obtain a compliant presentation and/or list of composite descriptions by sending a request to: advisorsolutions@crossmarkglobal.com

The Israel Impact portfolio creates an opportunity for the investor to not only exclude companies who violate the Israeli anti-embargo agreement, but to stand with Israel by investing in those companies that have a direct, positive impact on the economic growth and stability of the country. This composite includes all discretionary wrap accounts that are managed in this style. The composite excludes portfolios for which the clients have imposed restrictions or requirements that impede the manager from fully executing their strategy such that the results will not be representative of the strategy. For comparison purposes, the composite is measured against the S&P 500 Index. The S&P 500 Index is large capitalization weighted index of 500 U.S. companies generally considered to be representative of stock market activity.

The U.S. Dollar is the currency used to express performance. The performance reflects the reinvestment of dividends and other earnings to the extent that client accounts included in the composite elected to reinvest dividends and earnings. Performance figures shown gross of fees do not reflect the payment of investment advisory fees. Net performance was calculated using the hypothetical highest annual all inclusive wrap fee of 1.50% applied quarterly.

Past performance is not an indicator of future results. Investments made using this strategy involve risk of loss, including the potential loss of principal. The principal risks associated with the Israel Impact investment strategy are equity market risk – loss of principal and security selection risk i.e. companies that do not conduct significant business in Israel outperform the companies included in the portfolio.
