All Investments are subject to risks, including the possible loss of principal. Past performance does not guarantee future results.

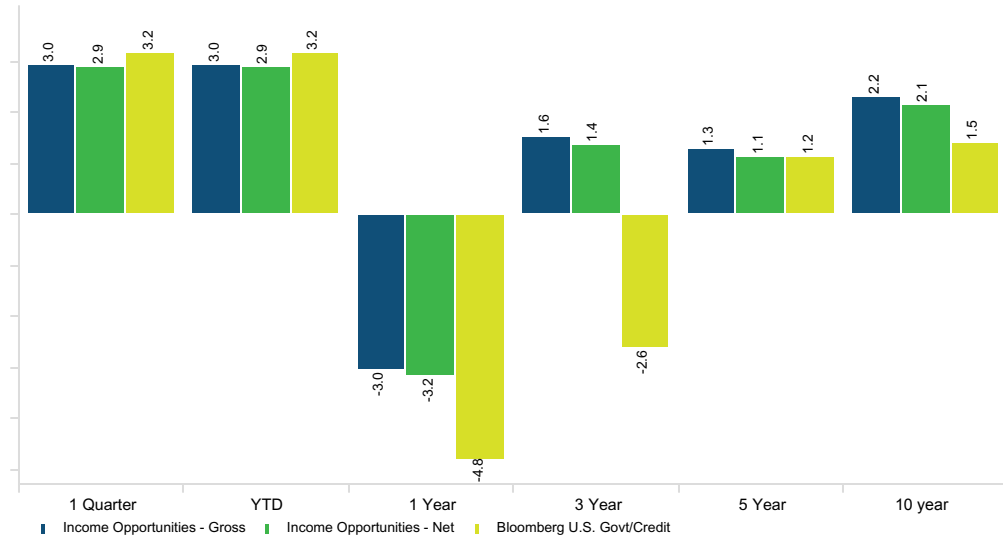

Composite illustrated is the Crossmark Income Opportunities Composite.

Crossmark uses a model account to manage the individual client accounts that have selected this investment strategy. The portfolio characteristics shown are based on the model account. The characteristics of any individual account may differ from those of the model account. All performance information shown is composite performance derived from the aggregate of all accounts included in the composite.

Net performance was calculated using actual management fees.

Index returns shown assume the reinvestment of all dividends and distributions.

Composite Performance (%)

Composite Trailing Returns

	1 Quarter	YTD	1 Year	3 Year	5 Year	10 Year
Income Opportunities - Gross	2.96%	2.96%	-3.03%	1.56%	1.29%	2.24%
Income Opportunities - Net	2.92%	2.92%	-3.17%	1.40%	1.13%	2.06%
Bloomberg U.S. Govt/Credit	3.17%	3.17%	-4.81%	-2.63%	1.16%	1.50%

Composite Calendar Year Returns

	2022	2021	2020	2019	2018	2017	2016	2015	2014
Income Opportunities - Gross	-10.35	1.16	4.11	9.81	-0.76	4.85	5.61	0.45	7.56
Income Opportunities - Net	-10.49	1.00	3.94	9.64	-0.93	4.66	5.43	0.27	7.32

Crossmark uses a model account to manage the individual client accounts that have selected this investment strategy. The portfolio characteristics shown are based on the model account. The characteristics of any individual account may differ from those of the model account. All performance information shown is composite performance derived from the aggregate of all accounts included in the composite.

Crossmark Global Investments, Inc. (Crossmark) is an investment adviser registered with the Securities and Exchange Commission that provides discretionary investment management services to mutual funds, institutions, and individual clients. Investment advice can be provided only after the delivery of Crossmark's firm Brochure and Brochure Supplement Form ADV (Parts 2A and 2B) and Form CRS, and once a properly executed investment advisory agreement has been entered into by the client. Crossmark claims compliance with the Global Investment Performance Standards (GIPS®). Prospective clients can obtain a GIPS Composite Report by sending a request to: advisorsolutions@crossmarkglobal.com.

The Crossmark Income Opportunities strategy seeks to generate a high level of income by investing in investment grade bonds, non-investment grade bonds (high yield), preferred stocks, REITS and bonds from emerging market countries. The Crossmark Income Opportunities Composite is comprised of all discretionary, fee-paying, commission-based, non-wrap fee, dual-contract and/or separately managed accounts managed to this strategy. The composite has a creation date and inception date of January 1, 2013. The primary benchmark for this composite is the Bloomberg U.S. Government/Credit Bond Index. The Bloomberg U.S. Government/Credit Bond Index measures the performance of investments grade corporate debt and agency bonds that are dollar denominated and have a remaining maturity of greater than one year.

The U.S. Dollar is the currency used to express performance. The performance reflects the reinvestment of dividends and other earnings to the extent that client accounts included in the composite elected to reinvest dividends and earnings. Performance figures shown gross of fees do not reflect the payment of investment advisory fees.

All Investments are subject to risks, including the possible loss of principal. Past performance does not guarantee future results. The Income Opportunities strategy may not achieve its objective if the managers' expectations regarding particular securities or markets are not met. Fixed income investments generally involve three principal risks—interest rate risk, credit risk, and liquidity risk. Prices of fixed-income securities rise and fall in response to interest rate changes (interest rate risk). Generally, when interest rates rise, prices of fixed-income securities fall. The longer the duration of the security, the more sensitive the security is to this risk. There is also a risk that the issuer of a note or bond will be unable to pay agreed interest payments and may be unable to repay the principal upon maturity (credit risk). Lower-rated bonds, and bonds with longer final maturities, generally have higher credit risks. As interest rates rise and/or the credit risk associated with a particular issuer changes, bonds held within a portfolio may become difficult to liquidate without realizing a loss (liquidity risk).

Net performance was calculated using actual management fees.

Index returns shown assume the reinvestment of all dividends and distributions.
