Crossmark Global Investments, Inc. (Crossmark) is an investment adviser registered with the Securities and Exchange Commission that provides discretionary investment management services to mutual funds, institutions, and individual clients. Crossmark claims compliance with the Global Investment Performance Standards (GIPS®). Prospective clients can obtain a GIPS Composite Report by sending a request to: advisorsolutions@crossmarkglobal.com.

The Crossmark Large Cap Core Unscreend Diversified strategy consists of accounts that are invested in stocks of large and mega-cap U.S. companies, and seeks to outperform the investment benchmark over a market cycle. The Large Cap Core Unscreend Diversified Composite was created on July 1, 2021 and consists of all discretionary, fee-paying, commission-based, dual contract and/or separately managed accounts that are managed according to this strategy. The primary benchmark for this composite is the Russell 1000 Index. The Russell 1000 Index is a market index that tracks the largest 1,000 stocks by market capitalization that are included in the Russell 3000 index.

The U.S. Dollar is the currency used to express performance. The performance reflects the reinvestment of dividends and other earnings to the extent that client accounts included in the composite elected to reinvest dividends and earnings. Performance figures shown gross of fees do not reflect the payment of investment advisory fees.

All Investments are subject to risks, including the possible loss of principal. Past performance does not guarantee future results. The Large Cap Core Unscreend Diversified strategy may not achieve its objective if the managers' expectations regarding particular securities or markets are not met. Equity investments generally involve two principal risks—market risk and selection risk. The value of equity securities will rise and fall in response to general market and/or economic conditions (equity market risk). The value of any individual equity security will rise and fall in response to the market's perception of the issuer's revenues, earnings, balance sheet, credit worthiness, business plan, and overall perception of the viability of the issuer's business (selection risk).

*Model Portfolios are based on a hypothetical account managed during the current quarter. Actual characteristics and income may differ materially from model. Net performance was calculated using actual management fees.

Index returns shown assume the reinvestment of all dividends and distributions.
