All investments are subject to risks, including the possible loss of principal. Past performance does not guarantee future results.

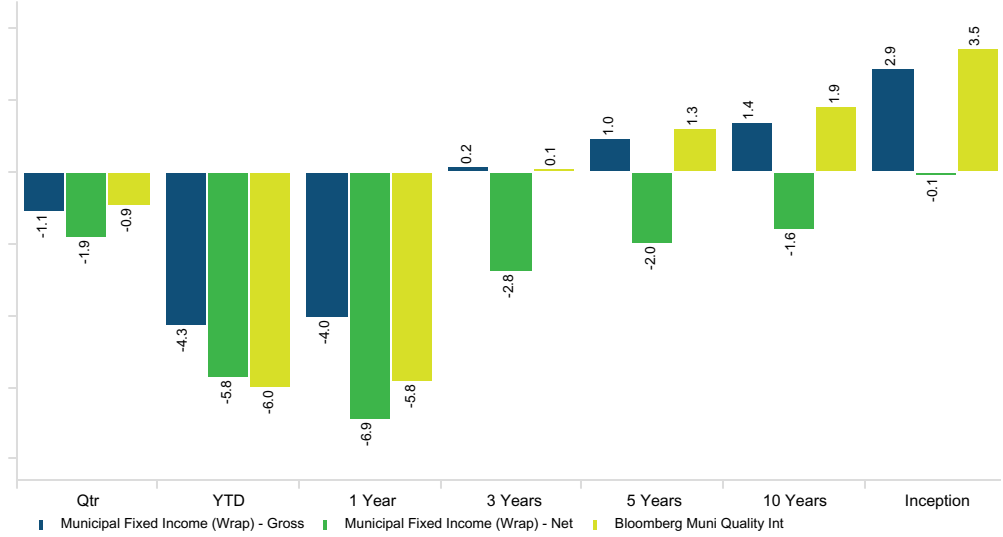

Composite illustrated is the Crossmark Municipal Fixed Income Wrap Composite.

* Model Portfolios are based on a hypothetical account managed during the current quarter. Actual characteristics and income may differ materially from model.

Net performance was calculated using the hypothetical highest annual all-inclusive wrap fee of 3.00% by deducting .75% from the last month of each quarter. Gross performance is shown as supplemental information and is stated as pure gross of all fees as the returns have not been reduced by transaction costs. Wrap fees include Crossmark's portfolio management fee as well as all charges for trading costs, custody, and other administrative fees. Due to the effect of compounding, annual returns shown net of fees may be lower than the return that would be shown if the fee were deducted from the gross return at a single point in time

Index returns shown assume the reinvestment of all dividends and distributions.

Crossmark Global Investments, Inc. (Crossmark) is an investment adviser registered with the Securities and Exchange Commission that provides discretionary investment management services to mutual funds, institutions, and individual clients. Crossmark claims compliance with the Global Investment Performance Standards (GIPS®). Prospective clients can obtain a GIPS Composite Report by sending a request to: advisorsolutions@crossmarkglobal.com.

The Crossmark Fixed Municipal strategy invests solely in municipal bonds. The Crossmark Municipal Wrap Composite was created on January 1, 2002 and consists of all discretionary, fee-paying, wrap fee accounts managed using this strategy. The primary benchmark for this composite is the Bloomberg Municipal Quality Intermediate Bond Index. The Bloomberg Municipal Quality Intermediate Bond Index is an unmanaged index that consists of investment grade intermediate term municipal bonds.

The U.S. Dollar is the currency used to express performance. The performance reflects the reinvestment of dividends and other earnings to the extent that client accounts included in the composite elected to reinvest dividends and earnings. Performance figures shown gross of fees do not reflect the payment of investment advisory fees.

All Investments are subject to risks, including the possible loss of principal. Past performance does not guarantee future results. The Municipal Fixed Income strategy may not achieve its objective if the managers' expectations regarding particular securities or markets are not met. Fixed income investments generally involve three principal risks—interest rate risk, credit risk, and liquidity risk. Prices of fixed-income securities rise and fall in response to interest rate changes (interest rate risk). Generally, when interest rates rise, prices of fixed-income securities fall. The longer the duration of the security, the more sensitive the security is to this risk. There is also a risk that the issuer of a note or bond will be unable to pay agreed interest payments and may be unable to repay the principal upon maturity (credit risk). Lower-rated bonds, and bonds with longer final maturities, generally have higher credit risks. As interest rates rise and/or the credit risk associated with a particular issuer changes, bonds held within a portfolio may become difficult to liquidate without realizing a loss (liquidity risk). Many municipal bonds also include call features that allow the issuer to call the bonds—repaying the principal before maturity—usually done in the context of a refinancing transaction if/when interest rates fall. When a bond is called, the holder does not incur a loss, but cash received from the call must be re-deployed, generally in a less favorable interest rate environment (call risk).

*Model Portfolios are based on a hypothetical account managed during the current quarter. Actual characteristics and income may differ materially from model.

Net performance was calculated using the hypothetical highest annual all-inclusive wrap fee of 3.00% by deducting .75% from the last month of each quarter. Gross performance is shown as supplemental information and is stated as pure gross of all fees as the returns have not been reduced by transaction costs. Wrap fees include Crossmark's portfolio management fee as well as all charges for trading costs, custody, and other administrative fees. Due to the effect of compounding, annual returns shown net of fees may be lower than the return that would be shown if the fee were deducted from the gross return at a single point in time.

Index returns shown assume the reinvestment of all dividends and distributions.
