Composite Growth of \$100

Time Period: 7/1/2021 to 3/31/2024

All investments are subject to risks, including the possible loss of principal. Past performance does not guarantee future results.

Composite illustrated is the Crossmark Small Cap Growth Wrap Composite.

Net performance was calculated using the hypothetical highest annual all-inclusive wrap fee of 3.00% by deducting 0.75% from the last month of each quarter. Gross performance is shown as supplemental information and is stated as pure gross of all fees as the returns have not been reduced by transaction costs. Wrap fees include Crossmark's portfolio management fee as well as all charges for trading costs, custody, and other administrative fees. Due to the effect of compounding, annual returns shown net of fees may be lower than the return that would be shown if the fee were deducted from the gross return at a single point in time.

Index returns shown assume the reinvestment of all dividends and distributions.

¹ Crossmark uses a model account to manage the individual client accounts that have selected this investment strategy. The portfolio characteristics shown are based on the model account. The characteristics of any individual account may differ from those of the model account. All performance information shown is composite performance derived from the aggregate of all accounts included in the composite.

Crossmark Global Investments, Inc. (Crossmark) is an investment adviser registered with the Securities and Exchange Commission that provides discretionary investment management services to mutual funds, institutions, and individual clients. Investment advice can be provided only after the delivery of Crossmark's firm Brochure and Brochure Supplement Form ADV (Parts 2A and 2B) and Form CRS, and once a properly executed investment advisory agreement has been entered into by the client. Crossmark claims compliance with the Global Investment Performance Standards (GIPS®). Prospective clients can obtain a GIPS Composite Report by sending a request to: advisorsolutions@crossmarkglobal.com.

The Crossmark Small Cap Growth Strategy is composed of accounts primarily invested in small-cap U.S. equity securities with an emphasis on growth. The Small Cap Growth Wrap Composite is composed of all discretionary fee-paying wrap accounts managed using this strategy. The composite has a creation date and inception date of July 1, 2021. The primary benchmark for this composite is Russell 2000 Growth Index. The Russell 2000 Growth Index measures the performance of the large cap growth segment of the US equity universe.

The U.S. dollar is the currency used to express performance. The performance reflects the reinvestment of dividends and other earnings to the extent that client accounts included in the composite elected to reinvest dividends and earnings. Performance figures shown gross of fees do not reflect the payment of investment advisory fees.

All Investments are subject to risks, including the possible loss of principal. Past performance does not guarantee future results. The Small Cap Growth Strategy may not achieve its objective if the managers' expectations regarding particular securities or markets are not met. Equity investments generally involve two principal risks—market risk and selection risk. The value of equity securities will rise and fall in response to general market and/or economic conditions (equity market risk). The value of any individual equity security will rise and fall in response to the market's perception of the issuer's revenues, earnings, balance sheet, credit worthiness, business plan, and overall perception of the viability of the issuer's business (selection risk).

Small-cap investments may be subject to smaller companies risk. Stocks of smaller, less seasoned companies are generally subject to greater price fluctuations, less liquidity, higher transaction costs, and higher investment risk than those of larger, more seasoned issuers. Smaller companies may have limited product lines, markets, or financial resources, and they may be dependent on a limited management group or lack substantial capital reserves or an established performance record. There is generally less publicly available information about such companies than for larger, more established companies.

The Strategy's values-based screening policies exclude certain securities issuers from the universe of otherwise available investments. As a result, the Strategy may not achieve the same level of performance as it otherwise would have in the absence of the screening process. If the Strategy has invested in a company that is later discovered to be in violation of one or more screening criteria and liquidation of an investment in that company is required, selling the securities at issue could result in a loss to the Fund. Further, the Strategy's values-based screening policies may prevent the Strategy from participating in an otherwise suitable investment opportunity.
