Steward Large Cap Core Fund

Class / Ticker **Class A** SJCAx **Class C*** SJCCx **Class R6** SJCRx **Institutional Class** SJCIX

* Class C shares are not currently available for purchase.

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus, reports to shareholders, Statement of Additional Information (SAI) and other information about the Fund online at <https://www.crossmarkglobal.com/stewardfunds/>. You can also get this information at no cost by e-mailing a request to stewardfunds@crossmarkglobal.com, calling 1-888-845-6910 or asking your financial representative. The Prospectus and SAI, both dated August 28, 2024, as may be revised or supplemented from time to time, are incorporated by reference into this Summary Prospectus.

Investment Objective: Long-term capital appreciation.

Fees and Expenses of the Fund

The following table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and example below.**

SHAREHOLDER FEES (Fees paid directly from your investment)				
	Class A	Class C	Class R6	Institutional Class
Maximum sales charge (load) imposed on purchases	5.75% ¹	None	None	None
Maximum deferred sales charge (CDSC) (as a percentage of redemption proceeds)	None	1.00% ²	None	None
Maximum sales charge (load) imposed on reinvested dividends and other distributions	None	None	None	None
Maximum account fee	None	None	None	None

ANNUAL FUND OPERATING EXPENSES (Expenses that you pay each year as a percentage of the value of your investment)				
	Class A	Class C	Class R6	Institutional Class
Management Fees	0.50%	0.50%	0.50%	0.50%
Distribution (Rule 12b-1) Fees	0.25%	1.00%	None	None
Other Expenses ³	0.47%	0.46%	0.35%	0.46%
Total Annual Fund Operating Expenses	1.22%	1.96%	0.85%	0.96%
Fee Waiver and/or Expense Reimbursement ⁴	0.22%	0.21%	0.10%	0.21%
Total Annual Fund Operating Expenses After Fee Waivers and Reimbursement	1.00%	1.75%	0.75%	0.75%

¹ Class A shares are subject to a front-end sales charge of 5.75%. You may qualify for sales charge discounts if you and your immediate family invest, or agree to invest in the future, at least \$50,000 in Class A shares in Steward Funds. More information about these and other discounts and waivers is available from your financial representative and in "Sales Charges" (p. 155) and "Sales Charge Waivers and Discounts Available Through Intermediaries" (Appendix A) in the Prospectus. Investments of \$1 million or more may be eligible to buy Class A shares without a front-end sales charge, but may be subject to a contingent deferred sales charge (CDSC) of 1.00% if redeemed within 12 months of the original purchase date.

² Class C shares are subject to a CDSC. If you redeem your shares within twelve months of purchase you will be assessed a 1.00% CDSC. Class C shares convert to Class A shares after eight years. If you purchase Class C shares through a broker-dealer or other financial intermediary (such as a bank), your intermediary may impose different conversion terms, including an earlier conversion. More information is available from your financial representative and in "Sales Charges" (p. 155) and "Sales Charge Waivers and Discounts Available Through Intermediaries" (Appendix A) in the Prospectus.

³ "Other Expenses" for Class C and Class R6 are based on estimated amounts for the current fiscal year.

⁴ Crossmark has contractually agreed through August 31, 2025 to waive fees and reimburse expenses to the extent that total annual fund operating expenses (excluding brokerage costs, interest, taxes, dividend expense on short positions, litigation and indemnification expenses, acquired fund fees and expenses and extraordinary expenses (as determined under generally accepted accounting principles)) exceed 1.00%, 1.75%, 0.75% and 0.75% for Class A, Class C, Class R6 and Institutional Class, respectively. If it becomes unnecessary for Crossmark to waive fees or make reimbursements, Crossmark may recapture any of its prior waivers or reimbursements for a period not to exceed three years from the date on which the waiver or reimbursement was made to the extent that such a recapture does not cause the total annual fund operating expenses (excluding brokerage costs, interest, taxes, dividend expense on short positions, litigation and indemnification expenses, acquired fund fees and expenses and extraordinary

expenses (as determined under generally accepted accounting principles)) to exceed the applicable expense limitation in effect at the time of recoupment or in effect at the time of the waiver or reimbursement, whichever is lower. The agreement to waive fees and reimburse expenses may be terminated by the Board of Directors at any time and will terminate automatically upon termination of the Investment Advisory Agreement.

Example

This example can help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. It assumes:

- You invest \$10,000 for the periods shown and then redeem all of your shares at the end of those periods (except Class C is also shown assuming you kept your shares);
- Your investment has a 5% return each year; and
- The Fund's operating expenses (including one year of capped expenses in each period and the conversion of Class C shares to Class A shares after eight years) remain the same.

Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A	\$671	\$919	\$1,187	\$1,949
Class C (With Redemption)	\$278	\$595	\$1,038	\$2,077
Class C (Without Redemption)	\$178	\$595	\$1,038	\$2,077
Class R6	\$ 77	\$261	\$ 462	\$1,040
Institutional Class	\$ 77	\$285	\$ 510	\$1,159

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 98% of the average value of its portfolio.

Principal Investment Strategies

The Fund's principal investment strategy is to invest in a portfolio of large-cap equity securities, subject to the limitations of the Fund's values-based screening policies (see "Values-based Screens" below). Under normal market conditions, the Fund invests at least 80% of its assets in securities of large-cap companies.* Large-cap companies are defined by the market capitalization range of the Fund's benchmark index from time to time. For the Fund's benchmark index, this market capitalization range, as of June 30, 2024, is \$408.8 million to \$3.322 trillion. The Fund's benchmark index is a widely recognized large-cap index and is the same index identified in the Average Annual Total Returns table below. Substantially all of the equity securities in which the Fund invests will be included in the Fund's benchmark index at the time of purchase. The Fund may invest a portion of its assets in small- and mid-cap companies. The Fund may also invest in other investment companies and real estate investment trusts.

Portfolio management will select securities using an investment process that combines quantitative techniques, fundamental analysis and risk management. Securities generally are added to the portfolio based both on security rankings provided by multi-factor quantitative models and on fundamental analysis of the securities. In addition, portfolio management will utilize risk management techniques to establish constraints on the amounts invested in individual securities and sectors. Portfolio management will generally sell a security if its model ranking declines significantly or research reveals a significant deterioration of the company's fundamentals. Crossmark uses data from multiple third-party providers in the multi-factor quantitative models.

Through its multi-factor quantitative models and fundamental analysis, portfolio management may consider, among other factors, a company's valuation, financial strength, growth potential, competitive position in its industry, projected future earnings, cash flows and dividends when deciding whether to buy or sell investments. With respect to the rankings provided by the multi-factor quantitative models, the models also include a component for identifying companies that, through their activities, both externally and internally, seek to reduce risk and create long-term resilience through sustainable and responsible business practices. Crossmark believes that such companies exhibit positive values, including, but not limited to, the fair treatment of employees, respect for the environment, positive engagement with the communities in which they operate, and responsible governance practices. This component of the multi-factor quantitative models is based on data and ratings generated by multiple third-party providers unaffiliated with Crossmark.

* The 80% is measured as of the time of investment and is applied to the value of the Fund's net assets plus the amount of any borrowings for investment purposes. For purposes of this limit, investments include those made directly or through other investment companies that have substantially similar 80% policies. The Fund will provide shareholders with at least 60 days' prior notice of any change in this policy.

Values-based Screens. As noted above, in implementing its investment strategies, the Fund applies a set of values-based screens to use its best efforts to avoid investing in companies that are determined by Crossmark, pursuant to screening guidelines approved by the Fund's Board of Directors, to be: (1) materially involved in the production, distribution, retail, supply or licensing of alcohol or related products; (2) materially involved in the production, distribution, retail, supply or licensing of tobacco or related products (to include vaping and other alternative smoking products); (3) materially involved in gambling (to include the manufacture, distribution and operation of facilities and equipment whose intended use is gambling); (4) directly participating in providing abortions and/or the production of drugs that are used to terminate pregnancy; (5) leasing real estate to facilities providing abortions; (6) directly engaged in scientific research using stem cells derived from human embryos, fetal tissue or human embryo cloning techniques; (7) directly involved in the production, distribution or retail of adult entertainment; or (8) directly involved in the production, distribution, retail, supply or licensing of psychoactive recreational cannabis or derivative products. Because the Fund uses its best efforts to avoid investments in companies that do not pass the values-based screening criteria, it will divest itself, in a timely manner, of securities of companies that are subsequently added to the list of prohibited companies, although the sale may be delayed if such securities are illiquid or if Crossmark determines that an immediate sale would have a negative tax or other effect on the Fund. However, the Fund may invest up to 5% of its total assets in certain collective investment vehicles or derivatives that may hold or derive value from securities issued by otherwise excluded companies.

For purposes of the alcohol, tobacco and gambling screens, material involvement means that a company derives 10% or more of its revenues from the screened activities. For purposes of the adult entertainment screen, companies directly involved in the production, distribution or retail of adult entertainment (defined as media and materials intended to appeal exclusively to the prurient interest) and companies that derive 2% or more of their revenues from the screened activities are screened. For purposes of the abortion, abortion facilities, stem cell research and cannabis screens, there is no revenue threshold; any direct involvement in the screened activities will cause a company to be screened out of the investment universe. For purposes of the abortion and abortion facilities screens, a company that is not itself directly involved in the screened activities will be screened out of the investment universe if (a) it owns 20% or more of another company that is directly participating in the screened activities, or (b) it is 50% or more owned by another company that is directly participating in the screened activities.

Principal Risks of Investing in the Fund

Investment in the Fund involves risk. There can be no assurance that the Fund will achieve its investment objective. You can lose money on your investment in the Fund. When you sell your Fund shares, they may be worth less than what you paid for them. The Fund, by itself, does not constitute a balanced investment program. The Fund may not achieve its objective if portfolio management's expectations regarding particular securities or markets are not met. The value of shares of the Fund will be influenced by market conditions as well as by the performance of the securities in which the Fund invests. The Fund's performance may be better or worse than that of funds with similar investment policies. The Fund's performance is also likely to be different from that of funds that use different strategies for selecting investments.

Risks of investing in the Fund include:

- **Values-based Screening Policies Risk** – The Fund's values-based screening policies exclude certain securities issuers from the universe of otherwise available investments. As a result, the Fund may not achieve the same level of performance as it otherwise would have in the absence of the screening process. If the Fund has invested in a company that is later discovered to be in violation of one or more screening criteria and liquidation of an investment in that company is required, selling the securities at issue could result in a loss to the Fund. Further, the Fund's values-based screening policies may prevent the Fund from participating in an otherwise suitable investment opportunity.

- **Equity Securities Risk** – The value of equity securities will rise and fall in response to the activities of the companies that issued the securities, general market conditions and/or economic conditions. If an issuer is liquidated or declares bankruptcy, the claims of owners of the issuer's bonds will take precedence over the claims of owners of its equity securities.

- **Large-Cap Companies Risk** – Investments in large-cap companies are subject to the risks of equity securities. Large-cap companies may underperform other segments of the market because such companies may be less responsive to competitive challenges and opportunities and may be unable to attain high growth rates during periods of economic expansion.

- **Security Selection and Market Risk** – The Fund's portfolio securities may underperform the market or other funds with similar objectives. The value of the Fund's investments may also change with general market conditions.

- **Market Disruption and Geopolitical Risk** – Economies and financial markets throughout the world have become increasingly interconnected, which has increased the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. This includes reliance on global supply chains that are susceptible to disruptions resulting from, among other things, war and other armed conflicts, extreme weather events and natural disasters. Such supply chain disruptions can lead to, and have led to, economic and market disruptions that have far-reaching effects on financial markets worldwide. The value of the Fund's investments may be negatively affected by adverse changes in overall economic or market conditions, such as the level of economic activity and productivity, unemployment and labor force participation rates, inflation or deflation (and expectations for inflation or deflation), interest rates, demand and supply for particular products or resources including labor, and debt levels and credit ratings, among other factors. Such adverse conditions may contribute to an overall economic contraction across entire economies or markets, which may negatively impact the profitability of issuers operating in those economies or markets. In addition, geopolitical and other globally interconnected occurrences, including war, terrorism, economic uncertainty or financial crises, contagion, trade disputes, government debt crises

(including defaults or downgrades) or uncertainty about government debt payments, government shutdowns, public health crises, natural disasters, supply chain disruptions, climate change and related events or conditions, have led, and in the future may lead, to disruptions in the U.S. and world economies and markets, which may increase financial market volatility and have significant adverse direct or indirect effects on the Fund and its investments. Adverse market conditions or disruptions could cause the Fund to lose money, experience significant redemptions, and encounter operational difficulties. Although multiple asset classes may be affected by adverse market conditions or a particular market disruption, the duration and effects may not be the same for all types of assets.

Current military and other armed conflicts in various geographic regions, including those in Europe and the Middle East, can lead to, and have led to, economic and market disruptions, which may not be limited to the geographic region in which the conflict is occurring. Such conflicts can also result, and have resulted in some cases, in sanctions being levied by the United States, the European Union and/or other countries against countries or other actors involved in the conflict. In addition, such conflicts and related sanctions can adversely affect regional and global energy, commodities, financial and other markets and thus could affect the value of the Fund's investments. The extent and duration of any military conflict, related sanctions and resulting economic and market disruptions are impossible to predict, but could be substantial.

In addition, markets are becoming increasingly susceptible to disruption events resulting from the use of new and emerging technologies to engage in cyber-attacks or to take over the websites and/or social media accounts of companies, government entities or public officials, or to otherwise pose as or impersonate such, which then may be used to disseminate false or misleading information that can cause volatility in financial markets or for the stock of a particular company, group of companies, industry or other class of assets.

Other market disruption events include pandemic spread of the novel coronavirus known as COVID-19, which have caused significant uncertainty, market volatility, decreased economic and other activity, increased government activity, including economic stimulus measures, and supply chain disruptions. While COVID-19 is no longer considered to be a public health emergency, the Fund and its investments may be adversely affected by lingering effects of this virus or future pandemic spread of viruses.

Adverse market conditions or particular market disruptions, such as those discussed above, may magnify the impact of each of the other risks described in this "Principal Risks of Investing in the Fund" section and may increase volatility in one or more markets in which the Fund invests leading to the potential for greater losses for the Fund.

- **Inflation Risk** – Inflation risk is the risk that the real value of certain assets or real income from investments (the value of such assets or income after accounting for inflation) will be less in the future as inflation decreases the value of money. Inflation, and investors' expectation of future inflation, can impact the current value of the Fund's portfolio, resulting in lower asset values and losses to shareholders. The risk may be elevated compared to historical market conditions and could be impacted by monetary policy measures and the current interest rate environment.

- **Issuer Risk** – The value of a security may decline for a number of reasons that directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods or services.

- **Management Risk** – The Fund is subject to management risk because it is an actively managed investment portfolio. Crossmark will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results.

- **Investment Strategy Risk** – Proprietary and third party data and systems are utilized to support decision making by portfolio management for the Fund. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect Fund performance. Furthermore, there can be no assurance that the quantitative models used in managing the Fund will perform as anticipated or enable the Fund to achieve its objective.

- **Positive Value Investing Risk** – When portfolio management considers positive value characteristics when making investment decisions, there is a risk that the Fund may forgo otherwise attractive investment opportunities or increase or decrease its exposure to certain types of issuers and, therefore, may underperform funds that do not consider the same or any positive value characteristics. A company's positive value characteristics are determined by portfolio management based on data and rankings generated by one or more third-party providers unaffiliated with Crossmark and such information may be unavailable or unreliable. Additionally, investors can differ in their views of what constitutes positive value characteristics. As a result, the Fund may invest in issuers that do not reflect or support, or that act contrary to, the values of any particular investor or the widely-held traditional values expressed in the Fund's values-based screening policies.

- **Small- and Mid-Cap Companies Risk** – Investments in small- and mid-cap companies are subject to the risks of equity securities. Investment in small- and mid-cap companies may involve greater risks than investments in securities of large-cap companies because small- and mid-cap companies generally have a limited track record. Small- and mid-cap companies often have narrower markets, more limited managerial and financial resources and a less diversified product offering than larger, more established companies. As a result of these factors, the prices of these securities can be more volatile, which may increase the volatility of the Fund's portfolio. For small-cap companies, these risks are increased.

- **Other Investment Companies or Real Estate Investment Trusts Risk** – The Fund may invest in shares of other investment companies or real estate investment trusts ("funds"). The Fund bears a proportional share of the expenses of such other funds, which are in addition to those of the Fund. For example, the Fund will bear a portion of such other funds' investment advisory fees, although the fees paid by the Fund to Crossmark will not be proportionally reduced.

• **Focus Risk** – To the extent that the Fund focuses its investments in particular industries, asset classes or sectors of the economy, any market price movements, regulatory or technological changes, or economic conditions affecting companies in those industries, asset classes or sectors may have a significant impact on the Fund’s performance. The Fund may become more focused in particular industries, asset classes or sectors of the economy as a result of changes in the valuation of the Fund’s investments or fluctuations in the Fund’s assets, and the Fund is not required to reduce such exposures under these circumstances.

• **Concentration Policy Risk** – To the extent securities of any one industry or group of industries comprise close to (or exceed due to market movements) 25% of the Fund, the Fund may be limited in its ability to purchase additional securities or to overweight with respect to that industry or industry group, due to the Fund’s fundamental policy not to concentrate in a particular industry or industry group.

• **Share Ownership Concentration Risk** – To the extent that a significant portion of the Fund’s shares is held by a limited number of shareholders or their affiliates, there is a risk that the share trading activities of these shareholders could disrupt the Fund’s investment strategies, which could have adverse consequences for the Fund and other shareholders. Significant shareholders of the Fund may make relatively large redemptions or purchases of Fund shares. These transactions may cause the Fund to have to sell securities or invest additional cash, as the case may be. While it is impossible to predict the overall impact of these transactions over time, there could be adverse effects on the Fund’s performance to the extent that the Fund may be required to sell securities or invest cash at times when it would not otherwise do so. These transactions could adversely impact the Fund’s liquidity, accelerate the recognition of taxable income if sales of securities resulted in capital gains or other income and increase transaction costs, which may adversely affect the Fund’s performance. These transactions could also adversely impact the Fund’s ability to implement its investment strategies and pursue its investment objective, and, as a result, a larger portion of the Fund’s assets may be held in cash or cash equivalents. In addition, large redemptions could significantly reduce the Fund’s assets, which may result in an increase in the Fund’s expense ratio on account of expenses being spread over a smaller asset base and/or the loss of fee breakpoints.

Performance

The following bar chart and table provide some indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year to year and by showing how the Fund’s average annual returns over different periods compare with those of a broad measure of market performance, respectively. The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. The Calendar Year Total Returns bar chart shows performance of Institutional Class shares year by year since the Fund’s inception. Returns for other share classes will differ only to the extent that they have different expenses. Updated performance information is available on the Fund’s website at www.stewardfunds.com.

Class R6 shares of the Fund were opened on April 24, 2024 and therefore do not have a full calendar year of performance available.

Institutional Class Calendar Year Total Returns

Best Quarter	Q4 2023	12.87%
Worst Quarter	Q2 2022	-15.96%
Year-To-Date Return	Q2 2024	11.54%

* Inception date was November 15, 2021

The following table illustrates the impact of taxes on the Fund's returns (Institutional Class is shown; after-tax returns for other share classes will differ). After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. After-tax returns depend on your own tax situation and may be different from those shown. This information does not apply if you are tax-exempt or your Fund shares are held in a tax-advantaged account such as an individual retirement account or 401(k) plan.

AVERAGE ANNUAL TOTAL RETURNS	For the periods ended December 31, 2023	
	1 Year	Since Inception (11/15/21)
Institutional Class		
Return Before Taxes	24.00%	1.26%
Return After Taxes on Distributions	23.78%	1.05%
Return After Taxes on Distributions and Sale of Fund Shares	14.36%	0.94%
Class A		
Return Before Taxes	16.62%	-1.78%
Index		
Russell 1000 Index (reflects no deduction for fees, expenses or taxes)	26.53%	1.53%

Management

Crossmark is the Fund's investment adviser. Robert Doll serves as lead portfolio manager of the Fund and Ryan Caylor serves as co-portfolio manager of the Fund. Mr. Doll is Chief Investment Officer of Crossmark and has served as a portfolio manager of the Fund since November 15, 2021, the Fund's inception date. Mr. Caylor is Head of Research and a Portfolio Manager of Crossmark and has served as a portfolio manager of the Fund since November 15, 2021, the Fund's inception date.

Minimum Investment and Eligibility Requirements

Class A and Class C – The minimum initial investment is \$1,000 for regular accounts and for individual retirement accounts. The minimum initial investment is waived for continuous investment plans through which at least \$50 is invested per transaction. There is no minimum for subsequent purchases. *Class C shares of the Fund are not currently available for purchase.*

Class R6 – There is no minimum investment. Class R6 shares are sold only through authorized dealers that have an omnibus account in place; they are not available for purchase directly through the Fund's distributor.

Institutional Class – The minimum initial investment is \$100,000, except that for Charitable Trusts or Grantor Trusts for which a charitable organization serves as trustee, the minimum initial investment is \$25,000. The minimum subsequent investment is \$1,000.

The minimum investment requirements may be waived in the case of investments through authorized dealers that have an omnibus account in place and in certain other instances as determined by Crossmark Distributors in its discretion. The Independent Directors of the Steward Funds may invest in Institutional Class shares without regard to the stated minimum investment requirements.

Sale of Fund Shares

Fund shares may be redeemed on any business day through authorized dealers, or by writing the Fund's Transfer Agent at Steward Funds, c/o The Northern Trust Company, P.O. Box 4766, Chicago, IL 60680-4766. Redemptions in the amount of at least \$1,000 may be wired. You may also arrange for periodic withdrawals of at least \$50 if you have invested at least \$5,000 in the Fund.

Federal Income Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains (or a combination of both).

Payments to Financial Intermediaries (Not Applicable to Class R6)

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
