#### Index Definitions

The **Bloomberg U.S. Government/Credit Bond Index** is a broad-based flagship benchmark that measures the non-securitized component of the U.S. Aggregate Index with less than 10 years to maturity. The index includes investment grade, US dollar-denominated, fixed-rate treasuries, government-related and corporate securities. TR (Total Return) indexes include daily reinvestment of dividends.

The **CBOE S&P 500 BuyWrite Index** is a benchmark index designed to show the hypothetical performance of a portfolio that engages in a buy-write strategy using S&P 500 index call options.

The **ICE BofA 3 Month U.S. Treasury Index** measures the performance of a single issue of outstanding treasury bill which matures closest to, but not beyond, three months from the rebalancing date. The issue is purchased at the beginning of the month and held for a full month; at the end of the month that issue is sold and rolled into a newly selected issue.

The **MSCI World High Dividend Yield Index** is based on the MSCI World Index, its parent index, and includes large and mid cap stocks across 23 Developed Markets (DM) countries\*. The index is designed to reflect the performance of equities in the parent index (excluding REITs) with higher dividend income and quality characteristics than average dividend yields that are both sustainable and persistent.

The **Russell 1000® Index** measures the performance of the large cap segment of the U.S. equity universe.

The **Russell 1000® Growth Index** measures the performance of the large cap growth segment of the US equity universe. It includes those Russell 1000 companies with relatively higher price-to-book ratios, higher I/B/E/S forecast medium term (2 year) growth and higher sales per share historical growth (5 years).

The **Russell 1000® Value Index** measures the performance of the large cap value segment of the US equity universe. It includes those Russell 1000 companies with relatively lower price-to-book ratios, lower I/B/E/S forecast medium term (2 year) growth and lower sales per share historical growth (5 years).

The **Russell 2000 Growth® Index** measures the performance of the largecap growth segment of the US equity universe. It includes those Russell 2000 companies with relatively higher price-to-book ratios, higher I/B/E/S forecast medium term (2 year) growth and higher sales per share historical growth (5 years).

The **S&P 500® Index** is widely regarded as the best single gauge of large-cap U.S. equities. There is over USD 11.2 trillion indexed or benchmarked to the index, with indexed assets comprising approximately USD 4.6 trillion of this total. The index includes 500 leading companies and covers approximately 80% of available market capitalization. TR (Total Return) indexes include daily reinvestment of dividends.

The **S&P 1000® Index** combines the S&P MidCap 400® and the S&P SmallCap 600® to form an investable benchmark for the mid- to small-cap segment of the U.S. equity market. TR (Total Return) indexes include daily reinvestment of dividends.

The **S&P Global 1200 ADR Index** is constructed from the non-U.S. components of the S&P Global 1200. These include the S&P Europe 350, S&P/TOPIX 150 (Japan), S&P/TSX 60 (Canada), S&P/ASX All Australian 50, S&P Asia 50, and S&P Latin America 40. All Level II and Level III ADRs or ordinary share listings in the U.S. issued by the constituents of these indices are included. TR (Total Return) indexes include daily reinvestment of dividends.

The **S&P Global 1200 Index** provides efficient exposure to the global equity market. Capturing approximately 70% of global market capitalization, it is constructed as a composite of 7 headline indices, many of which are accepted leaders in their regions. These include the S&P 500® (US), S&P Europe 350, S&P TOPIX 150 (Japan), S&P/TSX 60 (Canada), S&P/ASX All Australian 50, S&P Asia 50 and S&P Latin America 40. TR (Total Return) indexes include daily reinvestment of dividends.

# STEWARD FUNDS: PERFORMANCE

As of: 3/31/2022

\*Expense ratio published in prospectus dated 10/29/21.

\*\*Expense ratio published in prospectus dated 11/15/21.

+Crossmark has contractually agreed through October 28, 2022 to waive fees and reimburse expenses to the extent that total annual Fund operating expenses (excluding brokerage costs, interest, taxes, dividend expense on short positions, litigation and indemnification expenses, acquired fund fees and expenses and extraordinary expenses (as determined under generally accepted accounting principles)) exceed 1.25%, 2.00%, 0.90% and 1.00% for Class A, Class C, Class R6 and Institutional Class, respectively. If it becomes unnecessary for Crossmark to waive fees or make reimbursements, Crossmark may recapture any of its prior waivers or reimbursements for a period not to exceed three fiscal years from the fiscal year in which the waiver or reimbursement was made to the extent that such a recapture does not cause the total annual Fund operating expenses (excluding brokerage costs, interest, taxes, dividend expense on short positions, litigation and indemnification expenses, acquired fund fees and expenses and extraordinary expenses (as determined under generally accepted accounting principles)) to exceed the applicable expense limitation in effect at the time of recoupment or in effect at the time of the waiver or reimbursement, whichever is lower. The agreement to waive fees and reimburse expenses may be terminated by the Board of Directors at any time and will terminate automatically upon termination of the Investment Advisory Agreement.

++Crossmark has contractually agreed through November 14, 2022 to waive fees and reimburse expenses to the extent that total annual Fund operating expenses (excluding brokerage costs, interest, taxes, dividend expense on short positions, litigation and indemnification expenses, acquired fund fees and expenses and extraordinary expenses (as determined under generally accepted accounting principles)) exceed 1.25%, 2.00%, 0.90% and 1.00% for Class A, Class C, Class R6 and Institutional Class, respectively. If it becomes unnecessary for Crossmark to waive fees or make reimbursements, Crossmark may recapture any of its prior waivers or reimbursements for a period not to exceed three fiscal years from the fiscal year in which the waiver or reimbursement was made to the extent that such a recapture does not cause the total annual Fund operating expenses (excluding brokerage costs, interest, taxes, dividend expense on short positions, litigation and indemnification expenses, acquired fund fees and expenses and extraordinary expenses (as determined under generally accepted accounting principles)) to exceed the applicable expense limitation in effect at the time of recoupment or in effect at the time of the waiver or reimbursement, whichever is lower. The agreement to waive fees and reimburse expenses may be terminated by the Board of Directors at any time and will terminate automatically upon termination of the Investment Advisory Agreement.

The Steward Funds are distributed by Crossmark Distributors, Inc., member FINRA. Crossmark Distributors is an affiliate of Crossmark Global Investments, Inc., the Steward Funds' investment adviser. Crossmark Global Investments is an investment adviser registered with the Securities and Exchange Commission that provides discretionary investment management services to mutual funds, institutions, and individual clients.

The Funds may not achieve their objectives if the managers' expectations regarding particular securities or markets are not met. Equity investments generally involve two principal risks—market risk and selection risk. The value of equity securities will rise and fall in response to general market and/or economic conditions (equity market risk). The value of any individual equity security will rise and fall in response to the market's perception of the issuer's revenues, earnings, balance sheet, credit worthiness, business plan, and overall perception of the viability of the issuer's business (selection risk).

Small-cap investments may be subject to smaller companies risk. Stocks of smaller, less seasoned companies are generally subject to greater price fluctuations, less liquidity, higher transaction costs, and higher investment risk than those of larger, more seasoned issuers. Smaller companies may have limited product lines, markets, or financial resources, and they may be dependent on a limited management group or lack substantial capital reserves or an established performance record. There is generally less publicly available information about such companies than for larger, more established companies.

Investments in securities of issuers in foreign countries involves additional risks not associated with domestic investments. These risks include, but are not limited to: (1) political and financial instability; (2) currency exchange rate fluctuations; (3) greater price volatility and less liquidity in particular securities and in certain foreign markets; (4) lack of uniform accounting, auditing, and financial reporting standards; (5) less government regulation and supervision of some foreign stock exchanges, brokers and listed companies; (6) delays in transaction settlement in certain foreign markets; (7) less availability of information; and (8) imposition of foreign withholding or other taxes.

Options are not suitable for every investor. Writing call options to generate income and to potentially hedge against market declines by generating option premiums involves risk. These risks include, but are not limited to, potential losses if equity markets or an individual equity security do not move as expected, and the potential for greater losses than if these techniques had not been used. If the market price of a security increases, a call option written against that security limits the gain that can be realized. And, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives.

Fixed income investments generally involve three principal risks—interest rate risk, credit risk, and liquidity risk. Prices of fixed-income securities rise and fall in response to interest rate changes (interest rate risk). Generally, when interest rates rise, prices of fixed-income securities fall. The longer the duration of the security, the more sensitive the security is to this risk. There is also a risk that the issuer of a note or bond will be unable to pay agreed interest payments and may be unable to repay the principal upon maturity (credit risk). Lower-rated bonds, and bonds with longer final maturities, generally have higher credit risks. As interest rates rise and/or the credit risk associated with a particular issuer changes, bonds held within a portfolio may become difficult to liquidate without realizing a loss (liquidity risk).

The Steward Equity Market Neutral Fund also exposes the investor to short sale risk. An investor's account would incur a loss as a result of a short sale if the price of the security sold short increases in value between the date of the short sale and the date on which the account purchases the security to replace the borrowed security. In addition, the securities sold short may have to be returned to the lender on short notices, which may result in the account having to buy the securities sold short at an unfavorable price to close out a short position. If this occurs, any anticipated gain to the account may be reduced or eliminated, or the short sales may result in a loss.

The Fund's values-based screening policies exclude certain securities issuers from the universe of otherwise available investments. As a result, the Fund may not achieve the same level of performance as it otherwise would have in the absence of the screening process. If the Fund has invested in a company that is later discovered to be in violation of one or more screening criteria and liquidation of an investment in that company is required, selling the securities at issue could result in a loss to the Fund. Further, the Fund's values-based screening policies may prevent the Fund from participating in an otherwise suitable investment opportunity. With respect to the Steward Equity Market Neutral Fund, the values-based screening policies only apply to long positions.
